

## Planning, Training & Consulting Services

Aviem International, Inc. was formed in 1999 by emergency management professionals to help companies with the difficult challenges of responding to a disaster. We are the only company in the world with key personnel who have responded to transportation and other disasters from your perspective as a company executive.

Aviem is uniquely qualified to help you with your internal training and preparedness needs and to be there with you when the day comes when you must respond to an accident involving your company.

We have provided a brief description of the services available from Aviem. We are happy to provide detailed information about any aspect of our services that may be helpful to you.

**Corporate Response Plans** - Aviem can assist with the development of new plans or with upgrading and enhancing existing plans. Aviem ensures that plans are comprehensive in nature and that they take into account not only a company's internal resources and activities but ensures that the roles of any outside vendors who may support an emergency response are also clearly defined and integrated into the overall response plan.

Aviem will ensure that the corporate plan meets or exceeds the requirements of the Aviation Disaster Family Assistance Act of 1996 and the Foreign Air Carrier Support Act of 1997. We will even prepare a version of the plan to submit to the US Department of Transportation (DOT) and the National Transportation Safety Board (NTSB).

**Training** – Aviem provides a full line of training for all aspects of emergency response including:

- Family Assistance Training
- Crisis Communications Training
- Go Team Training
- Managing Emergency Operations for Executives
- Command Center Operations
- Leadership Training for Family Assistance Teams
- Setup and Operation of Family Assistance Centers & JFSOC

**Exercises & Drills** - No plan is complete until it's been tested. We provide complete development, conduct and evaluation of exercises. Types of exercises include tabletop, functional drills, response drills and full-scale drills.

Aviem can also develop exercises on a strictly internal basis or can coordinate and facilitate development of an exercise in conjunction with an airport, governmental agency, relief agency or other external authorities and organizations.

Once an exercise is complete, Aviem will work with you to provide detailed debriefings and an after-action report for follow up and action item issues.
